

The Domino S-Series *plus*

The simple to use laser system for high quality coding

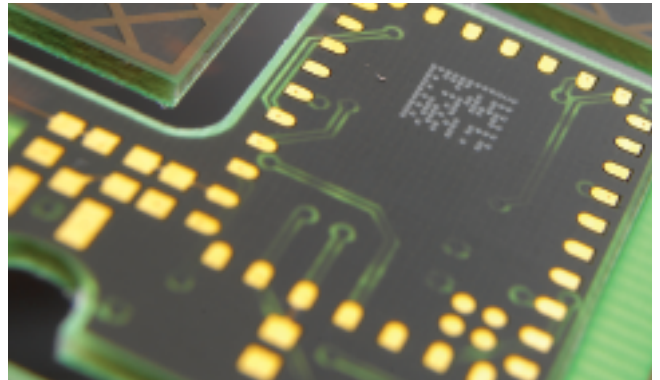

The S-Series **plus** range of printers provide all the benefits of high quality laser coding with the simplicity needed in today's manufacturing environments. Delivering letter quality codes, the S-Series **plus** delivers increased productivity and flexibility.

A supplier you can rely on:

- Supported by a **global sales and service network** the range delivers letter quality laser codes in the most demanding production environments
- The S-Series **plus** can be complemented by **TotalCare plus**, a range of managed maintenance services allowing manufacturers to choose their support model from fully outsourced to a self-sufficient approach

The S-Series **plus** part of the Domino **plus** programme

Versatile and quality codes

A manufacturer supplying manufacturers:

Domino's commitment to continually evolve by listening to manufacturers and supply the tools that will enhance their business.

- S-Series **plus** features directly impact the measured performance of the production environment
- S-Series **plus** offers versatile permanent coding from the simplest to the most complex applications
- Remote control and networking capabilities to integrate S-Series **plus** seamlessly into the production line

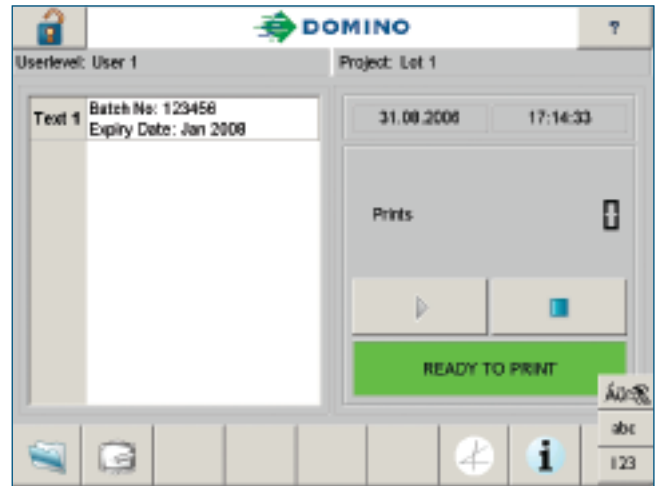

The S-Series **plus** range will improve overall equipment effectiveness – maximising uptime with minimal set-up and adjustment and consistent, high quality coding.

Benefits:

- **Reduced downtime** – machines designed for use in demanding environments to minimise unplanned stoppages for consistent performance
- **Clean operation** – Laser creates an indelible mark directly on to products and packaging without the need for ink or other chemicals
- **Compact** – With the smallest and lightest head in its class, the S-Series provides more options to mount into tight production spaces without causing obstruction

Letter quality codes reduce the risk of costly returns

Basic User Interface with pre-created message selection

- **Reduced set-up time** – With a simple “Text Assistant” and a clear WYSIWYG interface, codes are quick and easy to set up and edit
- **Fast product changeovers** – The Basic User Interface provides quick message selection and start-up and the laser head is easily adjustable due to the circular design
- **Reduced errors** – A visible red aiming beam allows operators to easily check code position and accuracy prior to coding. Multi-level user passwords give greater control and security
- **Reduced rejects** – Quality, legible codes reduce the risk of costly returns. The Domino DPX fume extraction system protects products against the risk of contamination from fumes and particles

S-Series plus benefits:

- **Easy installation** – with the smallest and lightest laser head in its class, a compact control cabinet and a step-by-step “Installation Wizard” the S-Series **plus** redefines easy laser integration
- **Minimum maintenance** – rated IP55 and designed for use in harsh environments the S-Series **plus** ensures optimum uptime for your machine without the need for water cooling
- **Simple operation** – designed for operator ease of use, the colour touch-screen with WYSIWYG display combined with Windows® based software ensures a familiar interface. Online help is also available for immediate assistance in a wide range of languages

Multiple line codes can be printed on a wide range of substrates

Quality, legible codes are ideal for the demands of the pharmaceutical industry

- **Versatile quality codes** – from simple, one-line messages to more complex applications involving 2D codes, serial numbering, real-time data or more complicated European and Asian characters
- **Speed and fonts** – S-Series **plus** offers the added flexibility of printing multiple line codes in a wide range of fonts, at heights of between 0.8mm to 76mm and speeds of up to 305m/min (1000ft/min)
- **Substrates** – Permanent, letter-quality codes can be marked onto a wide range of substrates including primary cartons, labels, plastics, and glass in the food, beverage, pharmaceutical and personal care industries

Integrated fume extraction:

The S-Series **plus** range of printers has a direct interface to the Domino DPX for automatic extraction of fumes and particles produced during laser marking. This ensures efficient and cost-effective laser coding as well as safeguarding the production environment and personnel.

Efficient and effective coding is ensured with the Domino DPX fume extraction system

The OPC server eliminates the need for application specific device drivers

Remote control and networking:

Utilising the OPC server provides seamless integration into ERP (SCADA) systems for:

- ERP (SCADA) coder control
- Message selection
- Status monitoring
- Access to performance metric data
